MINUTES OF THE REGULAR MEETING OF THE BOARD OF DIRECTORS Wednesday, August 31, 2016

I. CALL TO ORDER

There being a quorum, the regular meeting of the Board of Directors was called to order at 12:00 p.m., Wednesday, August 31, 2016. Present at the meeting were:

Francisco G. Santos, Chairman
Oscar A. Calvo, Vice Chairman
Timothy T. Kernaghan, Board Secretary
Melanie R. Mendiola, Member
Joanne M.S. Brown, General Manager
Alfred F. Duenas, Deputy General Manager (Admin & Finance)
Atty. Michael Phillips, Legal Counsel

Absent was Mr. Felix R. Pangelinan, Deputy General Manager of Operations. Also present was AM Insurance-Angelica Perez; DOI Office of Inspector General-Toby Wood, Claire Wyly; Chamber of Commerce-Thomas Hertslet; Guam Post-John O'Connor and Port Management staff.

II. APPROVAL OF MINUTES

a. **July 25, 2016** – **Regular Board Meeting:** The Vice Chairman made motion to approve the minutes of July 25, 2016 subject to correction. The motion was seconded by Director Kernaghan and was unanimously passed.

Addendum to Agenda: Before proceeding further into the agenda and without objections, Director Kernaghan made motion to add the following item FY2016 Federal Funding Summit Seminar, October 19-20, 2016, Austin, Texas onto the agenda under new business. The motion was seconded by Director Mendiola and was unanimously approved.

III. PUBLIC COMMENTS

- a. **Public Comments:** None.
- b. **Employee Comments:** None.

c. **PAGGMA Association:** Mr. Steven Muna, PAGGMA Vice President, proudly reported that the association placed 1st in the GovGuam Parks & Recreation Co-Ed Softball League. He also extended an invite to the GovGuam Labor Day Picnic on September 4, 2016.

IV. GENERAL MANAGER'S REPORT

The General Manager's report was provided for Board's information. The following key item(s) are noted as follows:

- 1. Port Authority of Guam Awarded a \$10 Million TIGER Grant: On July 29, 2016, the Port received notice that the U.S. Department of Transportation Office of the Secretary announced the U.S. DOT's FY2016 National Infrastructure Investments or TIGER VIII Discretionary Grant Program for the Rehabilitation of "H" Wharf with an award of \$10 Million. The Port plans to rehabilitate the wharf towards a multi-use facility that will be able to accommodate break bulk cargo, aggregate, RoRos and cruise ships. Upon favorable approval from the Port Board and the Public Utilities Commission, the Port will work with GEDA to address the remaining fifty (50%) percent of the financing for Hotel Wharf.
- 2. **Extension of Owner/Agent Engineer Services Contract:** The Port received notice on June 6, 2016 from the Governor's office that the Office of Economic Adjustment (OEA) approved the Port's request to extend the completion date of the OEA \$1.3 million grant to December 31, 2017.

3. Status of Port's Equipment Procurement:

- a. **Bid No. GSA/PAG-021-15 Tractors:** Award was made to Far East Equipment. A total of eight (8) tractors are expected to be delivered on October 19, 2016. A second purchase order was signed with a delivery scheduled for December 20, 2016. *No new developments*.
- b. **Bid No. GSA/PAG-018-15 Forklifts:** The 5-ton forklift was awarded to MidPac Far East. Expected delivery date is November 8, 2016. The 10-ton and 20-ton forklifts were awarded to Morrico and expected delivery is April 16, 2017. The latest development is that the 5-ton forklift arrived two weeks ago which is two months ahead of schedule. The Port was advised that such equipment is expected to be delivered to the Port today.
- c. **Bid No. GSA/PAG-015-15 Top Lifters:** Awarded to Morrico. Four (4) Top Lifters is expected to ship July 2016 and anticipated arrival is October 2016. *No new developments.*
- d. Street Sweeper: Awarded to Morrico. Expected delivery date is December 30, 2016. No new developments.

- 4. **Procurement of Golf Carts:** The Port procured six (6) additional golf carts from J & RNS Micronesian Pacific Enterprises which was received on July 27, 2016. The golf carts have been assigned to the divisions of Stevedoring, Terminal and Transportation.
- 5. Cementon Micronesia Complaint to PUC: On June 10, 2016, Cementon Micronesia filed a complaint against the Port with the Public Utilities Commission. Cementon entered into a lease agreement with the Port on November 2008 for a cement receiving and operating facility. Cementon receives its cement product through an access pipe installed on Gulf Pier from its supply vessel. Cementon has taken the position that it should not be required to pay wharfage charges to the Port and argues that another cement importing company, Hansen Permanente, is not required to pay wharfage fees in its lease agreement with the Port. This determination was the result of a previous court case against the Port that prohibited the Port from charging Hansen wharfage fees. Cementon also argues that Gulf Pier is not a public facility of the Port and views the wharfage fee as an imposition on the private use of Gulf Pier. Although Cementon continues to pay wharfage fees in "good faith", Cementon is requesting the PUC to approve an amendment to Cementon's lease agreement to eliminate Section 8 related to wharfage charges and also requests to be credited with all wharfage charges paid to date in addition to a recovery of attorney fees and costs.
- 6. **Dismantling of Mobile Harbor Crane:** On August 25, 2016, the Port forwarded a memorandum to General Services Agency (GSA) providing supporting documents for a competitive bid for the dismantling of the Mobile Harbor Crane Boom.

V. OLD BUSINESS

No old business discussed.

VI. NEW BUSINESS

1. ANZ ACH Authorization: Mr. Alfred Duenas, Deputy General Manager of Admin/Finance (DGMA) mentioned that periodically, the ANZ financial institution request agreement update and personnel authorized to instruct and/or notify the financial institution in matters relating to the origination of ACH files. Based on this, Board approval is being requested to approve the agreement update and authorization of port personnel designated as presented for this purpose. Director Mendiola made motion to approve the agreement update and port personnel designated for the ANZ ACH authorization. The motion was seconded by Director Kernaghan and was unanimously approved.

2. Travel Authorization Request:

a. American Association of Port Authorities 105th AAPA Annual Convention, October 23-36, 2016, New Orleans, LA: The Vice Chairman made motion to approve the travel authorization request as presented, seconded by Director Kernaghan. The motion was unanimously approved.

b. FY2016 Federal Funding Summit Seminar, October 19-20, 2016, Austin, TX: Director Kernaghan made motion to approve the travel authorization request as presented or as otherwise designated by the General Manager, seconded by Director Mendiola. The motion was unanimously approved.

VII. ADJOURNMENT

There being no further business to discuss, it was moved by Director Kernaghan and seconded by the Vice Chairman to adjourn the meeting at 12:35 p.m. The motion was unanimously passed.

TIMOTHY T. KERNAGHAN, Board Secretary

MINUTES OF THE SPECIAL MEETING OF THE BOARD OF DIRECTORS Wednesday, September 7, 2016

I. CALL TO ORDER

There being a quorum, the regular meeting of the Board of Directors was called to order at 11:50 a.m., Wednesday, September 7, 2016. Present at the meeting were:

Francisco G. Santos, Chairman
Oscar A. Calvo, Vice Chairman
Melanie R. Mendiola, Member
Joanne M.S. Brown, General Manager
Felix R. Pangelinan, Deputy General Manager (Operations)
Alfred F. Duenas, Deputy General Manager (Admin & Finance)
Atty. Theresa Rojas, Co-Counsel

Absent was Board of Director Timothy Kernaghan. Also present was Office of Senator Tom Ada-Peter Tran; Parsons Brinckerhoff-Shannon McLeod, Louis Wolinetz, Robert Johansen; PNC News-Janela Carrera; KUAM-Ken Quintanilla, Whisper Dela Cruz; Glimpses Publication-Lara Ozaki; Guam Post-John O'Connor and Port Management staff.

II. NEW BUSINESS

1. **Port Terminal Tariff Petition:** By way of background, and through the Ordering Provisions of the Public Utilities Commission (PUC) PAG Docket 13-01 of January 30, 2014 required the Port to seek approval of its 5-year rate plan. In doing so, the Port reengaged its Owner's Agent/Engineer, Parsons Brinckerhoff, to update the 5-year tariff petition and based on the financial analysis determined that there be an adjustment in the Port's terminal tariff of a 7% annual increase in each year from 2016 through 2020. However, at that time of March 2015 through Resolution No. 2015-01, the Board only approved a one time increase of 7% and subsequent proposed annual increases for the remaining four year of the petition shall be subjected to further financial review and approval of the Port Board. Upon further rate petition filing with PUC transmitting Resolution No. 2015-01, the Ordering Provision of PUC PAG Docket No. 15-04 required the Port to file a multi-year rate plan by October 1, 2016.

The General Manager mentioned that Parsons Brinckerhoff has since updated the financial analysis and determined that the annual adjustments in the Port's terminal tariff over the next five years would be 7% for years 1 and 2, and a 1% increase for years 3 through 5. Board consideration is now being requested to adopt the findings and recommendation contained

in the 5-year accelerated tariff petition analysis (2017-2021) prepared by Parsons Brinckerhoff dated this date by way of Resolution No. 2016-05. This will allow the Port to finance critical projects moving forward. The key identified projects include gate operating system; replacement of the Port Admin building; replace hotel wharf and access road; and waterline replacements.

The Chairman was encouraged with the Port Authority's continued progress in developing its facility to better serve the people of Guam as well as providing for the port employees. He expressed support on the movement forward. The Vice Chairman commented that the Port has come a long way in acquiring cargo handling equipment needs and expanding its existing footprint. He favors managements plan in taking the Port and its employees to the next level. With respect to the analysis prepared by Parsons Brinckerhoff, particularly the Capital Program list, Director Mendiola expressed that projects to increase efficiency of an organization makes good business sense and is in full support. She suggested that management may also want to consider the impacts of the workforce at a later time.

2. **Board Resolution No. 2016-05 Port Terminal Tariff:** Director Mendiola made motion to approve Resolution No. 2016-05 relative to filing the modified accelerated tariff petition to the Public Utilities Commission to support critical Port modernization projects and other sustainability related capital investments associated with projects identified in the Port of Guam Master Plan Update 2013. The motion was seconded by the Vice Chairman and was unanimously approved.

III. ADJOURNMENT

There being no further business to discuss, it was moved by the Chairman and seconded by the Vice Chairman to adjourn the meeting at 12:20 p.m. The motion was unanimously passed.

MEMORANDUM

TO:

General Manager

FROM:

Engineer Manager

SUBJECT:

2016 Summary Status - Ongoing & Proposed CIP Projects

The following is a summary list of aforementioned subject. Latest developments are italicized.

1) PROJECT:

Marine SLE Project, Wharf Repairs

IFB NUMBER:

PAGCIP-014-005 BME & Sons Inc.

CONTRACTOR:

\$4,541,635.00

PROJECT AMOUNT: DESIGNER:

Parson Brinkerhoff

PURCHASE ORDER:

No. 11332 OF

CHANGE ORDER:

\$45,000.00 (CO1), \$68,958.00 (CO2), (CO#3) \$492,120.50,

(C.O.#4) \$299,384.73

TOTAL AMOUNT:

\$5,447,098.23

FUNDING SOURCE:

Port Authority of Guam

NOTICE TO PROCEED:

January 5, 2015

COMPLETION TIME:

April 8, 2016 (360CD+100 Days CO2, CO3 and C.O4)

PAYMENT TO DATE:

\$4,685,213.13 \$761,885.10

BALANCE TO DATE: CM COST:

\$459,724.54

AMENDMENT NO. 1

\$109,117.92 (Amending of contract on-going)

PAYMENT TO DATE:

\$532,469.82 (CM)

BALANCE TO DATE:

\$36, 372.64

Construction Manager:

EMPSCO & Port Engineering/CIP Division

POINT OF CONTACT:

Danny Natividad, Proj. Manager (BME & Sons) Tel. # 632-3338 Iremar Gutierrez, Proj. Engr. (BME & Sons) Tel. # 777-4253

Jun Capulong, Consultant (EMPSCO) Tel. # 638-4716 Ferdie F. Cabuhat, Proj. QC (EMPSCO) CP # 988-4531

PAG ENGG/CIP Div.

WORK STATUS:

Bid opening was on 6/17/2014 & bid result has BME (\$4,541,635.00), Black Construction Corp.(\$4,677,318.00) & SmithBridge (\$8,978,324.88). Procurement is preparing the bid evaluation for management approval. Procurement is awaiting approval by PAG BoD for the Construction Manager budget. PNTP was issued on 9/29/2014. Contractor awaiting the DPW Building Permit approval. NTP was issued on 1/5/2015 & contractor start mobilization. Spur rail removal complete & asphalt pavement pouring is on 2/23-25/2015. Received divers certificate renewal copies & contractor to schedule the Wharf F3debris removal work. Debris removal & drop-off anodes along Wharf F3

is complete & start prepping sheet pile for anode installation. Ongoing works under Wharf F5 concrete beams/columns for spalls & cracks. Wharf F3 anode installation is at 90% complete. Anode full welding installation is at Wharf F4 Sta.10+00. FRP material's ETA will be on 9/1/2015 & FRP techrep will be on island on 9/9/2015 to supervise the FRP installation underneath wharf F5. BME continue full welding anode installation in F4 @ Sta.11+00 & part of Wharf F6.FRP jacket installation & epoxy grout pouring was observed by the FRP techrep on 9/10-14/2015 & work set-up was approved.

Anode installation is on-going in F4, Sta.14+04 & in F5, Sta.14+05 to Sta.27+04. Work ongoing on Anode installation at F-5 & F-6 awaiting FRP materials and additional grout. ETA end of November. Work ongoing on Crack & Spalls. C.O. No.3 will be submitted for approval. BME and Trident Cross continue installation of Anodes under Wharf F-5. Proposed Change Order No. 3 was approved by PAG Management, awaits amendment of contract by procurement. BME and Trident Cross continue to work for the installation of FRP Jacket, Installation of Anodes at toe wall and starts working of the approved change order no. 3. Procurement Amending Contract for Construction Management (EMPSCO). BME continue working for the installation of Anodes in the Toe wall, return wall, Rear wall and repairs of fendering concrete support under F-5. Empsco monitor progress work and review RFI and Proposed Change Order No.4 for negotiations. Submitted Propose Change Order No.4 for PAG Gen. Managers approval. Conducted a pre final inspection of F-3 concrete bulkhead repair as part of change order no.3 on March 4, 2016. BME completed installation and pouring of FRP jacket for repair of concrete column. Conducted Pre Final inspection of FRP and Beam repair under F-5 on March 21, 2016. Sea Engineering conducting an inspection of Anode installed at F-3 to F-6 on March 21 to 23, 2016. P.B. engineers will tentatively arrive Guam on March 30 and 31 for an inspection of the above subject. On March 25, 2016. PAG General Manager suspended Construction Management Services of EMPSCO for the MSLE project. Also, Installation of Anodes was suspended from BME and Trident Cross until further notice. Parson and Brinckerhoof with PAG Engineering conducted a pre-final inspection last March 30 to 31, 2016. A Punch lists was establish by P.B and PAG Engineering, BME contractor address the discrepancies listed on the punch list. A final inspection was conducted April 7, 2016 and all punch list items conforms as required to the project specifications. BME and Empsco awaits lifting of suspension for the Installation of Anodes as part of MSLE project. As per BME, PAG Management lifted suspension of anodes installation on 4/20/16. BME and subcontractor Trident Cross resume working at wharf F-3 4/25/16 for the punch lists of installation of anodes. BME has up to May 17, 2016 to complete punch lists and project. BME and subcontractor Trident Cross completed the correction of

BME and subcontractor Trident Cross completed the correction of punch list items of the installation of Welded Anodes from Sea Engineering on May 16, 2017. Followed by an inspection by AWS Welder Inspector Mr. Greg. Kaiser. And on May 5, 2016. Corrpro Cathodic Engineers conducted a continuity test of the installed anodes. A final report was submitted to C.M Empsco for final

Close out documents, A coordination is on going between Empsco and Pro Marine to conduct a final under water inspection of the installed welded Anodes from F-3 to F-6 BME progress billing invoices no. 13,14, &15 and 10% retainage fee are still on hold by the General Manager.

Billing Invoice 13,14,15 was paid by PAG, Change Order No. 4 was also approved by PAG Management on June 10, 2016. Empsco subcontractor PMT conducted a final underwater inspection of welded anodes from F-3 to F-6 and completed on july 8, 2016. Inspection report was given to C.M. Empsco and submitted to PAG 7/18/16. As per progress meeting on july 19,2016. All punch lists items found by Pro Marine will be repaired by BME and its subcontractor and tentatively start on July 25,2016. BME and subcontractor Trident Cross completed punch lists item repair Aug. 7, 2016 from Empsco and Pro Marine Anodes installation Inspection conducted as of July 8, 2016. Awaits Final Dive Inspection from Empsco and Pro Marine. Empsco submitted cost proposal for change order no.2 C.M. services as per contract April 8, 2016. PAG Engineering Reviewing cost proposal for negotiations.

EMPSCO submitted a revised cost proposal Change Order No.2 for Const. Management extension and inspection to Deputy General Manager Admin./Finance. Awaits instruction from PAG Management.

April 6, 2015

COMPLETION TIME:

October 2, 2015 (extended to Nov. 6, 2015)

PAYMENT TO DATE:

\$352,990.02

BALANCE PAYMENT:

\$0

Construction Manager: POINT OF CONTACT:

AmOrient Engineering/Port Engineering/CIP Division Vicente Escanilla, Proj. Manager (ProPacific Builders)

Jerlie M. Gutierrez, Proj. Engr. (PPB)

Aquilino Cabrias, Design Engr. (AmOrient)

PAG ENGG/CIP Div.

WORK STATUS:

100% Completed.

FY-16 WORK INJURY REPORT

(01/01/16 to 12/31/16)

Divisions	*Lost-time	**Recordable	*** Refused Treatment
Stevedoring	3	1	0
Transportation	2	0	0
Terminal	1	0	0
EQMR	1	0	0
Others	_0_	<u>0</u>	<u>0</u>
Total	7	1	0

Work Injury Summary for this reporting period: 09/12/2016

Total Injuries for FY-16 to date: 8— Injuries

- 7-- Lost-time
- 1 Recordable
- 0 Refused Medical Attention

Last disabling work injury was on:

09/09/2016

Number of days since last disabling work injury:

3-days

Note: PAG best record was 222 days or 7 months w/o a disabling work injury

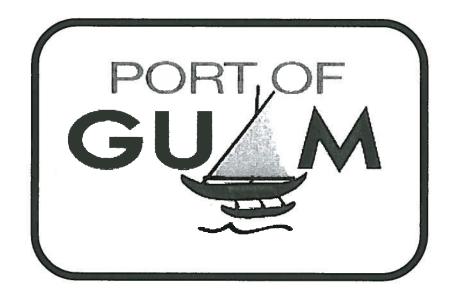

^{*}Lost-time = If an employee was injured on the job and medical doctor sent him/her home, his/her injury is considered a lost-time.

^{**}Recordable = If an employee was injured on the job and medical doctor treated him/her and released him/her back to work on the same day (Recordable because of medical charges).

^{***}Refused Medical Attention: Filed WC Forms 201 & 202 for record purposes only.

Port Authority of Guam Board of Directors Regular Board Meeting September 21, 2016

Executive Summary PAG-RFP-016-002 Architect Engineering Design and Consulting Services

PURPOSE: Request the Board of Directors to approve the Request for Proposal award to N.C Macario & Associates, Inc. for the Architect/Engineering Design and Consulting Services contract—PAG-RFP- No. 016-002.

BACKGROUND:

On March 11, 2016, a Request for Proposal (RFP) was issued to solicit qualified Architect/Engineering companies/firms to design and seek consultation on various Ports Improvement Projects by advertising a public notice through a local newspaper. The deadline to submit the bids was on April 8, 2016. Seven (7) Companies expressed their interest by registering and obtaining the package. Five (5) firms officially submitted their bids in response to the RFP.

After the opening of all sealed bids and determining that all bidders were responsible the submitted proposals were distributed and evaluated by the evaluation committee. The results of the evaluation committee revealed N.C Macario and Associates, Inc. as the most qualified bid offeror.

As part of the RFP procurement process, a letter of Notice of Intent to Award was sent on May 12, 2016 to contact N.C. Macario and Associates, Inc. to submit their cost proposal /audited rates in order to initiate the cost negotiation proceedings. A list of audited rates was submitted by offeror on May 26, 2016 and is attached for Board review. To effectuate this contract Task Order 1 was negotiated by our CIP and Planning Division and prepared by our Procurement Office. All parties have agreed to the cost of Seventy-Five Thousand Six Hundred Twenty-Four Dollars and Zero Cents (\$75,624.00) as well as the work to be performed in Task Order 1.

LEGAL REVIEW:

The necessary documents pertaining to this project have been prepared and are being reviewed by the Port's legal counsel. Upon Board's approval of this award and legal's approval of contract form, the agreement will be executed and issuance of the Notice to Proceed and Task Order 1 will follow thereafter.

FINANCE REVIEW:

Funding for Task Order 1 is made possible through Federal Fish and Wildlife Funds. Future projects issued via Task Orders against this contract will be made available from both local and federal funds.

RECOMMENDATION:

Management requests the Board of Directors' motion to approve the award of this RFP contract to N.C. Macario and Associates, Inc., for a period of Two (2) years from the date of issuance of the Notice to Proceed and with the option to renew this contract for one (1) additional year thereafter and not to exceed a total of three (3) years. The offeror has been deemed to have met all the requirements set forth in the RFP and is consistent with the Guam Procurement Regulations.

MEMORANDUM

TO:

General Manager

FROM:

Contracts Management Administrator

VIA:

Deputy General Manager, Admin & Finance

Subject:

Evaluation Analysis and Recommendation - Request for Proposal

RFP-016-002 A/E Design Consulting Services

The referenced Request for Proposal (RFP) was issued on March 11, 2016 advertised in The Guam Daily Post. The deadline for the proposal was at 2:00 p.m. on April 8, 2016. Seven (7) firms/individuals acknowledged receipts of packets and five (5) firms/individuals listed below submitted their proposal before the submission deadline. The submittals received were from:

- 1. N.C. Macario & Associates
- 2. E.M Chen & Associates
- 3. EMPSCO Engineering
- 4. TG Engineers, PC
- 5. AM Orient Engineering

Evaluation and Selection

Pursuant to Section XI of the RFP package, and after receipt of the proposals, the PAG Evaluation Committee independently evaluated each proposal to determine the most qualified and responsible offeror. The Committee members, which management appointed consist of the following:

- 1. Simeon Delos Santos
- 2. Enrique Conde
- 3. Dorothy Harris
- 4. Ernie Candoleta
- 5. Alex Aflague

The Committee completed and submitted their evaluation scores as reflected in the attached Evaluation Score Tally Sheet.

Recommendation

Based on the tabulation of the proposals submitted, it is determined that N.C. Macario & Associates scored 449 of 500, and is qualified to perform the required services in accordance with the criteria set forth in the RFP. Additionally, our review of the submitted required documents, N.C. Macario & Associates is deemed to have met the standards of responsibility and responsiveness outlined in the Guam Procurement Rules & Regulations.

Therefore, it is recommended that the firm of N.C. Macario & Associates, be given an opportunity to negotiate a fee to provide the services referenced RFP. In the event the negotiations prove unsuccessful, PAG will re-solicit this process. Should you need to discuss this matter further, I am available at your request.

Steven P. Muna

General Manager's Office Port Authority of Guam

May 26, 2016

Ms. Joanne M.S. Brown General Manager, Port of Guam Jose D. Leon Guerrero Commercial Port 1026 Cabras Highway, Suite 201, Piti, Guam 96925

Re: Notice of Intent to Award for the Request for Proposal PAG-016-002 A/E Design Consulting Services.

Dear Ms. Brown,

We acknowledge receipt of your letter for the Notice of Award to Intent dated May 12, 2016 for the above subject.

As requested we are submitting our Naval Facilities Marianas, US Navy (NavFacMar) audited standard rates for NCMA personnel (attached), these rates are being used NavFacMar for our firm as consultant to the Navy. We are using these rates as we will not be able to provide a new audited rate within the 3 days requested by PAG on your May 12, 2016 letter.

We are very extremely interested with the various PAG projects and we look forward to working with the Port of Guam. If you have any questions regarding this matter, please do not hesitate to call us at 646-0947.

Sincerely,

N.C. Macario & Associates, Inc.

MEMORANDUM

TO:

Board of Directors

FROM:

General Manager

SUBJECT:

Compensatory Time-Off

The Port Authority currently has port personnel with an accumulated compensatory time-off (CTO) hours. In accordance with the Port's Personnel Rules and Regulations (PR&R), an employee may be permitted to use compensatory time-off if the use of such time does not duly disrupt the operations of the Port. There are port employees that have not been able to reap the benefits of leisure time and are reaching the threshold allowable under the CTO requirement. A maximum of 240 hours of compensatory time for employees engaged in non-law enforcement work and 480 hours for law enforcement work. The PR&R further provides payments for accrued compensatory time earned which shall be paid at the regular rate earned by the employee at the time the employee receives such payment.

In light of this, Board approval is being requested to issue payments to those eligible employees with an accumulated compensatory time-off hours. The total CTO hours accrued amounts to \$165,000.00. The funding source for this purpose is through lapse funds in the General Expense account.

I am available for any questions you may have.

1 Executive Summary

This report is the conclusion of an evaluation into the feasibility of upgrading existing crane G3, currently located at Port Authority of Guam, USA.

Based on the crane's age, potential disruption to existing operations for construction activities, estimated costs for the necessary upgrades, and our estimated market value of the crane, our conclusion is that the potential upgrade is not fiscally feasible.

2 Introduction

At the request of the Port Authority of Guam, an investigation into the estimated costs to upgrade and modify existing Crane Number G3 and thus the feasibility of such, was performed. The upgrade and modifications to the existing crane are required in order to restore the structural integrity of the crane and to meet Industry Standards.

The objective of the investigation was to evaluate the following issues related to an upgrade versus purchase of a new or used crane.

- Upgrade/modification scope of work and associated costs
- Operational disruption created by upgrade/modification work (construction footprint/time frame)
- Life span of upgraded/modified crane.
- Market value of the crane.
- Cost of replacing the crane with a new or used crane.

A general survey of the crane was performed recently by the Port Authority of Guam (the information furnished was considered adequate in order to satisfy the objective of our "Order of Magnitude" level estimate.), and a structural survey was performed on August 20th, 2016 by MPBA through our contractor Challenge Engineering & Testing, Inc.

3 Existing Cranes' Basic Characteristics

Crane G3

Crane G3 was manufactured in 1983 by Hitachi. It was originally placed in service in the Phillippines and moved to Guam in 1992. The rail gauge is 50'0", safe working load below spreader is 40 long tons (89,600 lbs.). Total outreach beyond rail is 131'0". Lifting height above rail is 84'0".

The speeds for hoist are 160 fpm with load and 359 fpm empty, trolley is 500 fpm and gantry 150 fpm. The bumper to bumper overall width and operating clearance between legs meet typically required industry standards.

Synthesis

The age of the crane is approximately thirty-four (34) years old. Typically, for depreciation and appraisal purposes, a container crane's life is estimated as follows:

Structural and Mechanical – 30 Years

4 - PBA, LLC

Electrical – 20 Years

Container cranes, however, typically can have many more years of good service, greater than the life spans noted above, and are usually only considered obsolete when the operational characteristics do not meet vessel requirements. If a crane is refurbished and its operational characteristics are acceptable, then a forty (40) year life span or more can be attained.

Please note that additional details of the existing crane's current status can be found in the Appendix.

4 Budgetary Scope of Work / Estimated Cost to Modify and Upgrade

Crane Refurbishment and Modifications due to Deteriorated Conditions

Work Item Description	Cost in USD
Replace Festoon System	\$125,000
Upgrade/Replace Cab	\$125,000
Upgrade Drive	\$2,625,000
Misc. Mechanical / Structural/ Electrical Refurbishments	\$1,845,000
Paint Structure	\$400,000
Total Estimated Modifications	\$5,120,000
10% Contingency	\$520,000
Total with Contingency	\$5,640,000

5 Existing Crane Value Discussion

The following information is considered for use in this evaluation only, and is not to be construed as a value to be used for any future sale or for insurance purposes.

Cranes are typically valued based on five (5) general scenarios: (1) Value of the crane for sale to someone for use at another location (Market Value or Sale Value); this is the value for Port Authority of Guam to consider for evaluation of use for a sale price. (2) Value to replace crane with crane similar in principal characteristics and age (Replacement Value); this is the estimated replacement value to Port Authority of Guam at their facility in Piti, Guam. (3) Value to dispose of the crane (Disposal Value); (4) Value derived from the analysis of the ability of the crane to provide revenue for Port Authority of Guam

and be a true asset (Asset and Revenue Value) (5) Value to replace crane with new crane similar in principal characteristics (New Crane Value).

Scenario 1: Market Value

The Market Value (or Sale Value) is the cost associated with the true worth of the cranes in the open market. These values are typically estimated based on recent sale prices of similar cranes with similar operating conditions, or if recent sales prices are not available, prices are determined by values based on purchased crane prices, with deductions for age, transportation to another site, site specific issues, deteriorated conditions, if any, lack of warranty, spare parts requirements, marketability factors and others. This is not the worth of the cranes to Port Authority of Guam, or anyone else who would purchase the cranes for operation at the existing site in Piti, Guam. The Market Value (or Sale Value) has been evaluated in order to provide Port Authority of Guam a value to use in comparing pricing of upgrading/modifying crane G3, versus the sale of crane and purchase of new replacement equipment. The determination of a Market Value for crane is influenced by the availability of crane of similar characteristics, condition, age and performance, at the time of sale.

We know of no recent sales for cranes of similar age, size, and location of the subject cranes; therefore, below is a recap of our approach in determining the Market Value for the equipment, based on values from calculations.

- Book Value (which initially is equal to the purchase price) is reduced by the depreciation in the
 year being investigated. Theoretically, the book value of an item will equal the Market Value at
 any time within the economic life of that item.
- Depreciation For purposes of our investigation, we will determine depreciation based on our estimate of the purchase price (this can be changed to actual, if known) calculated to present worth, with life of asset as follows: (Structural and Mechanical 30 years/ Electrical 20 years). Our estimate of purchase price is \$3.1 million for Crane G3. We also estimate that the electrical portion of cost to be 30%, the mechanical portion to be 30%, and structural portion 40%. We have used the straight line method to determine depreciation (see calculations below).
- The budgetary scope of work and estimated costs for someone to consider if evaluating the purchase and relocation of Crane G3 to another port, are as follows (Note that lowering to traverse under an obstruction has not been included):

Scope		Cost (M=million) in USD
Relocation from Guam to Another West Coast, Haw	aiian, or Alaskan Port	\$2.50M to \$3.00M
Electrical Modifications		\$2.625M to \$2.89M
Miscellaneous Repairs/Modifications		\$2.360M to \$2.595M
Tie-Down/Stowage Pin Modifications to Crane		\$0.075M to \$0.15M
New Color Painting/Signage/Logo		\$0.15M to \$0.20M
Miscellaneous Modifications to Spreader/Headbloo	k Connection	\$0.025M to \$0.05M
Tie-Down Foundations in New Location		\$0.15M to \$0.25M
	Estimated Cost	\$7.885M to \$9.135M
	Estimated Engineering	\$0.20M
	TOTAL Budgetary Cost	\$8.085M to \$9.335M

Factors which influence the actual Market Value:

- Pricing for new cranes have increased disproportionally to inflation, due to currency evaluation, steel pricing and the significant market share of one large manufacturer.
 We estimate this cost impact as a 12.5% positive.
- The transportation cost to place the crane at another site (we have based our estimate on a West Coast, Hawaiian, or Alaskan "Jones Act" port location and a single crane sale) is estimated at a cost <u>negative</u> of \$2,500,000 to \$3,000,000 (see table above).
- Site specific issues at another location (Tie-downs/stowage pins, top coat/logo painting, electrical modifications, common spreader connections with existing equipment and miscellaneous minor refurbishment) is estimated at a \$400,000 to \$650,000 negative (see table above).
- Lack of warranty is estimated at a 1% of purchase price <u>negative</u>.
- In order to make marketable, a reduction may be required. We estimate this as a 20% negative.

Below are the calculations, based on the above factors:

Depreciation Crane G3

Initial Market Value at present worth with price increases outside of inflation.

I = 3%; N = 34 years

 $F = 3.1(1+.03)^{34}$

=\$8.47 million x 1.125 (12.5% positive for disproportionate increases) = \$9.53 million

Electrical - \$2,860,000 and 20 year life Mechanical - \$2,860,000 and 30 year life Structural - \$3,810,000 and 30 year life

 $D_{\text{j(elect)}} = 2.86/20 \times 34 = $4.86M$ $D_{\text{j(mech)}} = 2.86/30 \times 34 = $3.24M$ $D_{\text{j(struct)}} = 3.81/30 \times 34 = $4.32M$

Depreciated Value = \$9.53M - \$12.38M = \$0.00

Depreciated Market Value based on crane pricing in today's market = \$0.00

Scenario 2: Replacement Value

At this time for Port Authority of Guam evaluation purposes, we estimate the replacement budgetary cost range for Crane G3 from \$5.5M to \$7.0M with a median value of \$6.25M.

Scenario 3: Disposal Value

The disposal value is the estimated cost associated with disposing of the crane by way of dismantling and removing the components from the site. A disposal cost is estimated as \$350,000.

Scenario 4: Asset & Revenue Value

The cost associated with analyzing the advantages and disadvantages of owning the cranes. This value is based on the <u>actual</u> potential (or lack thereof) that the cranes have for creating revenue and being used as an asset to the Port. We do not have the necessary information to estimate this value, at this time.

Scenario 5: New Crane Value

The cost associated with purchasing new crane similar in characteristics and performance to the existing crane. The estimated cost for one (1) crane is \$9,000,000.

6 Environmental Conditions

Review of the current status of the crane and comparison with the last recorded OSHA certificate (06/16/2014) indicates the existence of a very aggressive corrosion environment in Guam, as it appears that crane G3 was found fit for operations in 2014. To avert similar outcomes for the remaining cranes in Guam, we recommend that the Port Authority of Guam take very aggressive steps towards the

general maintenance of cranes G4, G5 and G6, as these units are subjected to the same environmental conditions as Crane G3.

7 Conclusion

The estimated scope of work and subsequent costs for the required repairs and/or upgrades to restore the structural integrity of Crane G3 is significant. Our study reveals that the investment to repair the crane greatly exceeds the calculated value of the crane.

Furthermore, we believe that the potential upgrades to Crane G3 to adequately bring this unit to today's standards are not viable due to the following:

- 1. Estimated costs of upgrades
- 2. Age of crane and estimated remaining life (Up to 15 years) after upgrades.

Additionally, we do not believe that Crane G3 would garner enough interest in a sale to bring significant proceeds to Port Authority of Guam.

8 Appendix

PORT AUTHORITY OF GUAM INSPECTION FINDINGS.

PAG DOCKSIDE CONTAINER CRANES

PRELIMINARY SUMMARY OF CRANE CONDITIONS

Crane G3 Negative Conditions

According to PAG maintenance personnel this crane has been out of service and without any maintenance attention for at least 18 months. Negative conditions are significantly greater in number and severity than observed in the February 2013 survey, and are so far advanced the crane would require significant refurbishments and component replacements for safe and reliable container handling operation. PAG does not have sufficient personnel or capabilities to both maintain cranes G4-G6 and refurbish crane G3. This crane should be condemned and removed by dismantling. Summary of major negative conditions observed during the February 2016 condition survey include the following:

- 1. Gantry travel motion is not functional. Causation appears to be in the electrical control system. Correction would probably involve significant fault diagnostic efforts, component replacements and wire run replacements.
- 2. Main hoist motion is not functional. Causation is severe knocking and/or binding from region of the gearbox output shafts. Correction would probably involve significant diagnostic effort, replacement of drum couplings, replacement of gearbox output shaft bearings, refurbishment of highspeed wheel brakes, and replacement of highspeed couplings.
- 3. Trolley travel motion is very unreliable. Travel extent is not consistent, and loss of travel motion occurs frequently. Causation appears to be interlock circuits and elsewhere in the electrical control system. Correction would probably involve significant fault diagnostic efforts, component replacements, exterior conduit replacements and wire run replacements.
- 4. Main hoist wire ropes with moderate/severe corrosion on outer surfaces, thus expect rope interior surfaces with worse degradation. Correction would require replacement of all main hoist wire ropes.
- 5. Trolley travel towing wire ropes with moderate/severe corrosion on outer surfaces, thus expect rope interior surfaces with worse degradation. Correction would require replacement of all trolley travel wire ropes.

- 6. Boom hoist wire ropes with moderate/severe corrosion on outer surfaces, thus expect rope interior surfaces with worse degradation. Correction would require replacement of all boom hoist wire ropes.
- 7. In the machinery house, right ventilation fan with very rough-sounding motor, left fan is not functional. Correction would require replacement of both ventilation fan motor assemblies.
- 8. In the machinery house, main hoist left drum coupling wear indicator is 1/32" beyond the service limit mark, and right wear indicator is 1/32" before the mark. Correction would involve replacement of both drum couplings.
- 9. In the machinery house, left main hoist brake air gap is 3/32" beyond maximum setting, right brake air gap is at the maximum setting. Correction would involve adjustment of both brakes to correct air gap setting.
- 10. Gantry travel equalizer beams with frequent severe corrosion and past corrosion wastage present around equalizer pins, member edges and on surfaces where rainwater collects. Correction would involve comprehensive blast cleaning, installation of plate replacements or reinforcements, and repainting.
- 11. Boom bolted splice plates at underside of top flanges (typical left and right) are corroded to approximately 50% of original thickness. Correction would involve replacement of top flange underside splice plates and all structural bolts.
- 12. Trolley girder lower web plates at bolted splice beneath machinery house are corroded through. Correction would involve installation of reinforcement plates and replacement of structural bolts.
- 13. Right trolley girder outboard flange at bolted splice, corrosion wastage has reduced flange thickness approximately 20%.14.
- 14. Exterior surfaces of entire structure have frequent moderate/severe corrosion present at member edges, corners, welds and where rainwater collects. Many locations of plate edge corrosion delamination are present. Material loss from corrosion wastage in the range 20% 50% of original plate thickness. Corner locations where rainwater collects frequently corroded through. Correction would involve comprehensive blast cleaning, installation of plate replacements or reinforcements, and repainting.
- 15. At trolley girder end tie, majority of structural bolts supporting the end tie, trolley bumper stops, main hoist sheave frames, trolley towrope sheave frames, walkways and platforms with severe corrosion Correction would involve replacement of many structural bolt/nut/washer assemblies.

- 16. All roller assemblies for supporting main hoist and trolley travel wire ropes have moderate/severe corrosion present. None of these roller assemblies move freely. Correction would involve comprehensive replacement of all roller assemblies for supporting wire ropes, blast cleaning of the affected areas, and repainting.
- 17. All roller assemblies on the trolley for protecting main hoist wire ropes are missing roller bodies, only axles are present, and all components with moderate/severe corrosion present. Correction would involve comprehensive replacement of all roller assemblies on the trolley, blast cleaning of affected areas, and repainting.
- 18. At left and right trolley rails, head thicknesses measure in range 0.64"-0.68", head widths range 1.80"-1.92". Original dimensions head thickness 0.84", head width 2.00". Trolley rail head thicknesses are worn below their service limit. Correction would involve comprehensive replacement of all trolley rails.
- 19. The spreader attitude (list and trim) adjustment device at boom tip is not functional. Causation appears to be moderate corrosion of the ballscrew assemblies, absence of lubrication, deterioration of bellows for protecting ballscrews, and deterioration of the electrical control. Correction would involve comprehensive rebuilding of the assembly, fault diagnosis of the electrical control, component replacements, and probably wire run replacements.
- 20. At the boom tip, left trolley towrope sheave with moderate corrosion blisters on groove surface. Correction would involve grinding surface of this sheave groove smooth.
- 21. Boom hoist rope flap seals at offshore wall of machinery house are fully deteriorated. These flap seals intended to minimize rainwater entry to boom hoist assembly and machinery house interior. Correction would involve comprehensive replacement of the flap seal assembly.
- 22. Gantry travel storm railbrakes are disabled in the raised (released) position. The crane is not protected against high-wind runaway by these brakes. Correction would involve comprehensive rebuilding or replacement of the storm railbrake assemblies.
- 23. At gantry travel drive bogies, meshing surfaces of all spur gears with moderate/severe corrosion. Correction would involve power wire-brush cleaning of spur gears, followed by application of specialty open gear grease lubricant.
- 24. At the operator's cabin, severe corrosion present on platform bar-grate at cabin door. Platform deflects downward under personnel foot pressure. Correction would involve comprehensive replacement of this platform.

25. On the trolley, two side guide rollers are missing, and two are seized on their axles. Correction would involve replacement of all 4 guide rollers assemblies.				

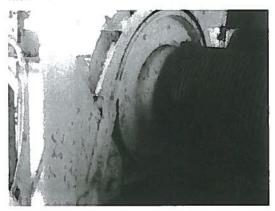

PAG DOCKSIDE CONTAINER CRANES PRELIMINARY SUMMARY OF CRANE CONDITIONS

Crane G3 Negative Conditions

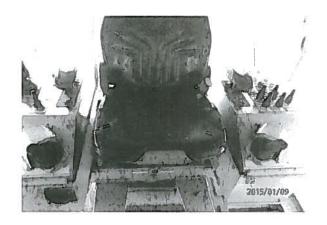

1. Gantry travel motion is not functional.

2. Main hoist motion is not functional.

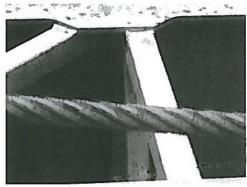

3. Trolley travel motion is very unreliable. Travel extent is not consistent, and loss of travel motion occurs frequently.

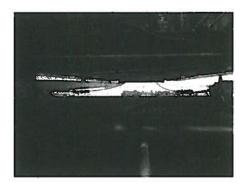

4. Main hoist wire ropes with moderate/severe corrosion on outer surfaces

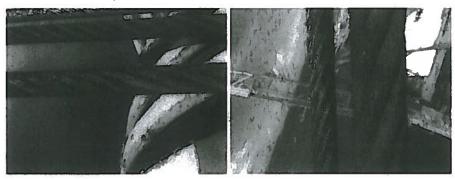

5. Trolley travel towing wire ropes with moderate/severe corrosion on outer surfaces

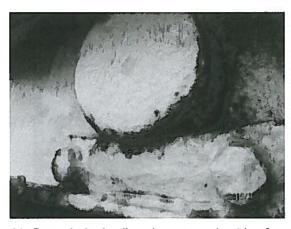

6. Boom hoist wire ropes with moderate/severe corrosion on outer surfaces

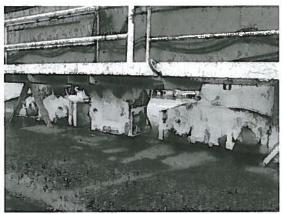

- 7. In the machinery house, right ventilation fan with very rough-sounding motor, left fan is not functional.
- 8. In the machinery house, main hoist left drum coupling wear indicator is 1/32" beyond the service limit mark, and right wear indicator is 1/32" before the mark.

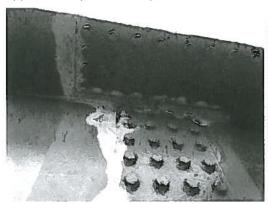

- 9. In the machinery house, left main hoist brake air gap is 3/32" beyond maximum setting, right brake air gap is at the maximum setting.
- 10. Gantry travel equalizer beams with frequent severe corrosion and past corrosion wastage present around equalizer pins, member edges and on surfaces where rainwater collects.

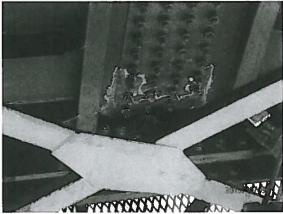

11. Boom bolted splice plates at underside of top flanges (typical left and right) are corroded to approximately 50% of original thickness.

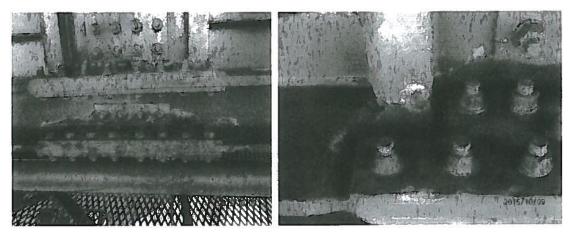

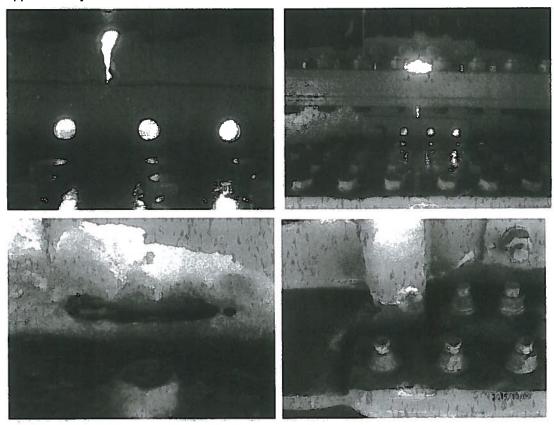

12. Trolley girder lower web plates at bolted splice beneath machinery house are corroded through.

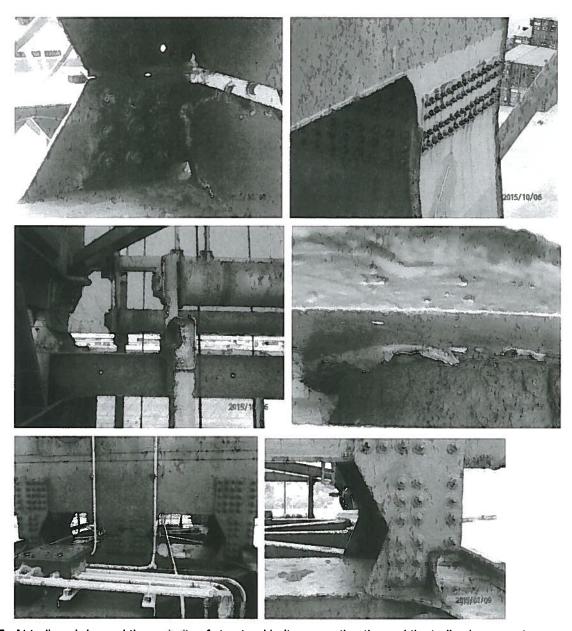

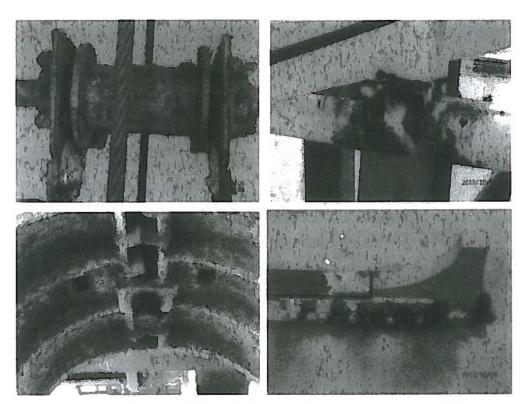

13. Right trolley girder outboard flange at bolted splice, corrosion wastage has reduced flange thickness approximately 20%.

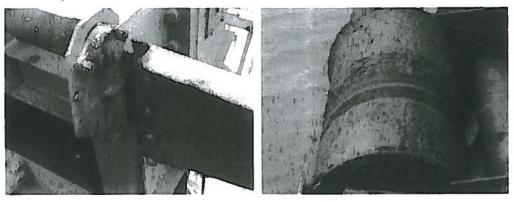

14. Exterior surfaces of entire structure have frequent moderate/severe corrosion present at member edges, corners, welds and where rainwater collects. Many locations of plate edge corrosion delamination are present. Material loss from corrosion wastage in the range 20% - 50% of original plate thickness.

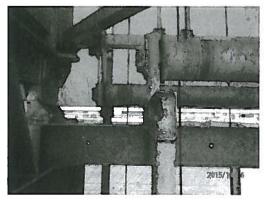

15. At trolley girder end tie, majority of structural bolts supporting the end tie, trolley bumper stops, main hoist sheave frames, trolley towrope sheave frames, walkways and platforms with severe corrosion

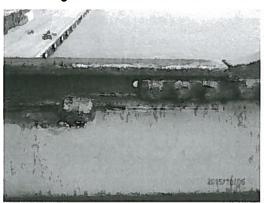

16. All roller assemblies for supporting main hoist and trolley travel wire ropes have moderate/severe corrosion present.

17. All roller assemblies on the trolley for protecting main hoist wire ropes are missing roller bodies, only axles are present, and all components with moderate/severe corrosion present.

18. At left and right trolley rails, head thicknesses measure in range 0.64"-0.68", head widths range 1.80"-1.92". Original dimensions head thickness 0.84", head width 2.00".

- 19. The spreader attitude (list and trim) adjustment device at boom tip is not functional.
- 20. At the boom tip, left trolley towrope sheave with moderate corrosion blisters on groove surface.
- 21. Boom hoist rope flap seals at offshore wall of machinery house are fully deteriorated.

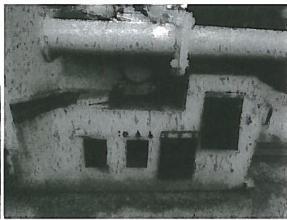

22. Gantry travel storm railbrakes are disabled in the raised (released) position.

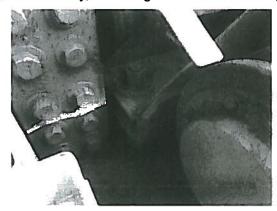

23. At gantry travel drive bogies, meshing surfaces of all spur gears with moderate/severe corrosion.

- 24. At the operator's cabin, severe corrosion present on platform bar-grate at cabin door.
- 25. On the trolley, two side guide rollers are missing, and two are seized on their axles.

Re: Container Crane Inspection Program
Matson Shipping Lines, Inc.
Hitachi Gantry Crane "G3" Port of Guam

Gentlemen:

We are pleased to submit this report of findings for the recently completed NDT inspection program for the Hitachi "G3" Crane located at the Port of Guam.

The scope of work and mobilization of our staff was authorized on August 20th, 2016 by Mr. Paul Bridges, President of Paul Bridges & Associates, Inc.

Mr. V.J. Thompson III, P.E. and Mr. David Wiggins, AWS/CWI of Challenge Engineering & Testing, Inc. mobilized to Guam on Wednesday, August 24th for the purpose on conducting a visual examination of the "G3" Hitachi crane.

The Hitachi Gantry Crane (G3), Serial Number 83N0430 was manufactured in 1983. It was originally placed in service in the Philippines then moved to Guam in 1992. The rail gauge is 50'0" with a width opening between the waterside legs of 55'0". The designed lifting capacity, maximum below spreader is 40 long tons (89,600 lbs.). Total outreach beyond rail is 131'0". Lifting height above rail and below spreader is 84'0". The rail is setback 9'0" from fenders on dock.

It is our understanding this crane has been out of service for the past 24 months and requires significant maintenance.

Our field inspection efforts were to perform a thorough visual examination of the crane accessible to climbing technicians and from a man lift supplied by Matson Shipping. Ultrasonic thickness (UT) measurements were performed in areas that indicated severe metal loss age.

The thickness measurements were performed in designated test locations by using an Olympus 380L Plus ultrasonic unit.

The inspection was coordinated with Mr. Lance Hagans, Facilities & Maintenance Manager for Matson Lines in Guam. Mr. Eugene Macdon, field superintendent for Matson, was an on-site assistant and escort during our field inspection at the Port.

The field inspection commenced on Friday morning, August 26th concluding Monday, August 29, 2016.

Matson provided support personnel and a man-lift to reach those areas of the crane from the boom down. Special emphasis was placed on boom joint connections to crane below trolley girder.

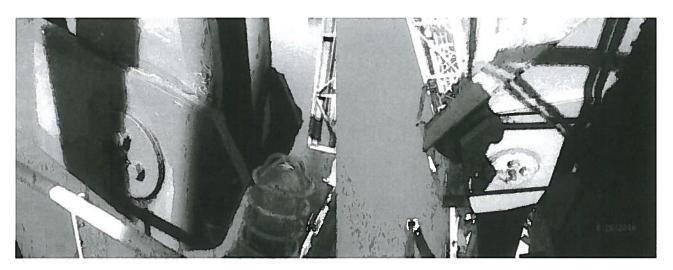

Upon arrival at the Port on Friday, we were notified the boom on the crane has been up since February 2016 and was advised to remain in that position until further maintenance was performed to assure boom would not fall due to a cable failure or boom not be able to be raised upon completion of examination.

The notes recorded during the examination of the container crane is reported below:

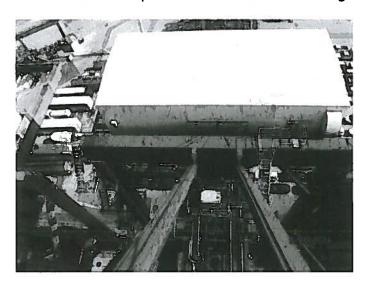

A. FORESTAYS

- 1. There is substantial corrosion on forestay connections at the apex (top of mast) and at top of boom.
- 2. The hinge connection plates have pitting and experienced corrosion.

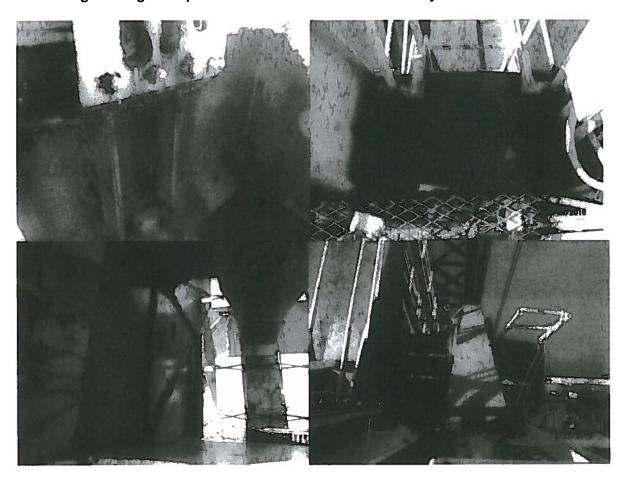

B. BACKSTAYS

1. Severe corrosion at apex on both sides around hinge connection.

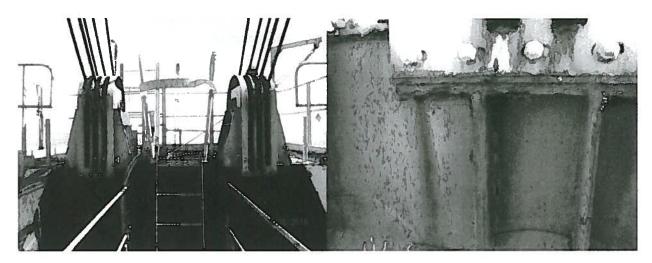

C. TOP OF CRANE - APEX

- 1. Top plate is severely corroded.
- 2. Cross members below apex noted to be severely corroded.
- 3. Round cross member connections below apex on mast to boom are severely corroded.
- 4. Strengthener gusset plates below boom sheaves severely corroded.

D. APEX "A" FRAME

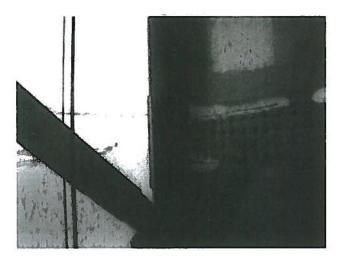

- 1. Top 5/8" plate on apex has experienced >50% metal loss.
- 2. Severe corrosion along flange edges.
- 3. Boom sheave connections severely corroded.
- 4. Gusset plate welds on mast mid pipe supports both sides severely corroded.
- 5. Cross members below apex severely corroded at mast joints

E. BOOM

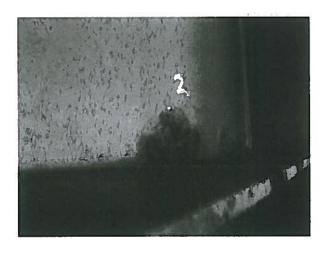

- 1. The boom was not lowered due to safety concerns.
- 2. Cross bracing was noted to be severely corroded mostly on bottom sides.
- 3. Bolted spice plates moderate to severe corrosion bolts & nuts deteriorated in many areas.
- 4. Boxed cross members severely corroded.
- 5. Catwalk framing and some grating have experienced moderate to severe corrosion.
- 6. Localized corrosion around hinge pin supports on both sides
- 7. Trolley and main lifting cable supports all require replacement
- 8. Box plate cross member very severely corroded with holes at boom locking point (top of apex).

F. TROLLEY GIRDER

- 1. Bottom of cross members severely corroded.
- 2. Trolley rail bottom flange corroded.
- 3. Bottom of east and west splice plates behind machine house corroded with holes and missing bolts.
- 4. Main hoist trolley guides severely corrode
- 5. Aft main hoist guides severely corroded behind machine house.
- 6. Top plate flanges on trolley girder supports severely corroded
- 7. East trolley girder noted to have hole corroded thru web near trolley tensioner
- 8. Square tube trolley girder diagonals waterside of trolley tensioner severely corroded.
- 9. Electrical box connections at back of girder corroded.
- 10. Aft trolley support stops corroded.
- 11. Outside of truss girder to crane bolted connections severely corroded.
- 12. Bottom of trolley girder severely corroded in areas near land side sill beam.
- 13. Four foot from hinge web wall corrosion = UT thickness 0.375" nominal. 0.250" remaining.

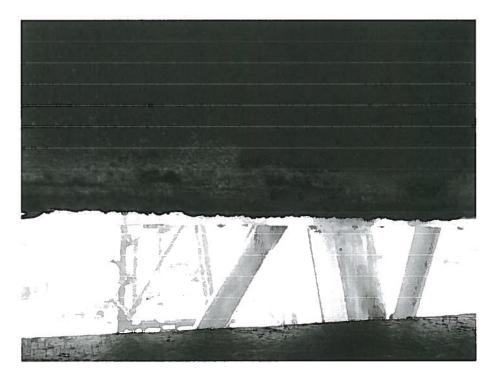

14. Gusset – 4 Ft. from hinge – severe corrosion

G. TROLLEY TENSIONER

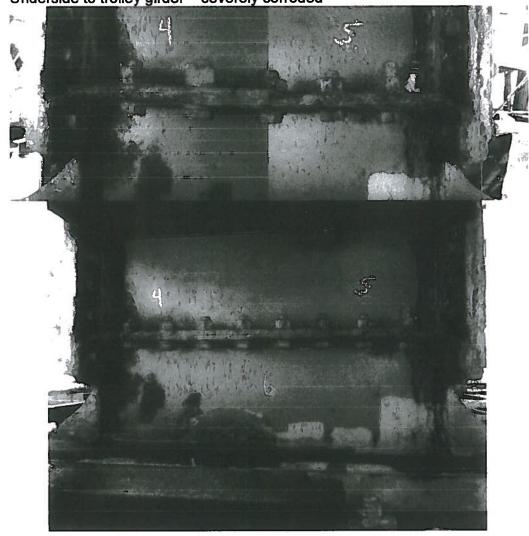

- 1. Tensioner support frame and components severely corroded.
- 2. Landside of trolley tensioner support connections at trolley girder on both sides with 1"-6" diameter holes.
- 3. Tensioner support cross box very severely corroded
- 4. Underside East Side corroded holes

H. UPPER WATERSIDE SILL BEAMS

- 1. Top and bottom flanges severely corroded
- Splice plates and bolts severely corroded require replacement
 Isolated deep pitting and severe corrosion areas
- 4. Under beam back reach trolley supports corroded

5. Underside to trolley girder - severely corroded

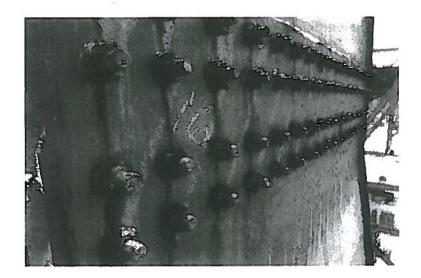

Page 10

6. Gusset of underside diagonal to leg – west side

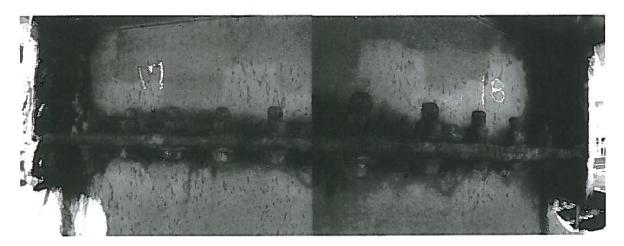

7. East water side leg – very severely corroded – nuts and bolts at upper sill beam splice.

8. East water side – splice connection to boom – catastrophic corrosion.

I. UPPER LANDSIDE SILL BEAMS

- 1. Severe corrosion in isolated areas across top flanges
- 2. Corrosion pockets >50% loss on side plates near machine house.
- 3. Trolley girder support plate bolts very bad condition on machine house side.
- 4. Severe corrosion on underside of trolley supports
- 5. Severe corrosion and pitting on top of cross box supports under sill beam
- 5. Lower east side spice plates require replacement
- 6. Lower west side splice plates edges gone
- 7. Sill beam to machine house support east side

Page 12

9. Landside to trolley girder connection – catastrophic corrosion

Page 13

J. TROLLEY

1. Trolley corroded front and back ends.

K. MACHINE HOUSE

1. Fair condition

L. OPERATOR STATION

1. Corrosion noted on all support members

M. HOISTING CABLES

1. Boom, main & trolley wires ropes severely corroded and require replacement

N. STAIRCASE, CATWALKS & ACCESS LADDERS

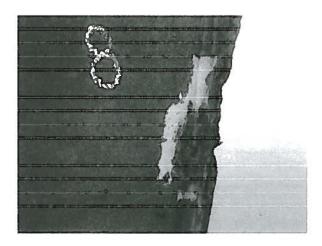

1. All framework and supports need to be checked as there are many areas which require replacement.

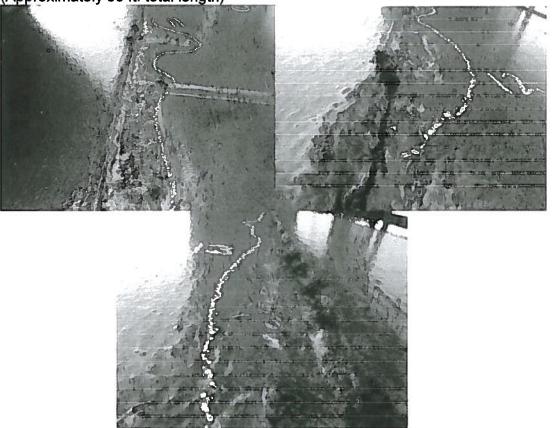

O. WATER SIDE LEGS WEST LEG

1. West leg across from diesel house roof – severe flange corrosion

Page 14

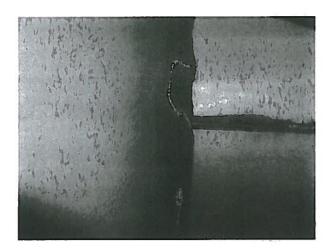

2. Very severe corrosion from sill beam to portal beam – greater than 50 % loss (Approximately 30 ft. total length)

Page 15

EAST LEG

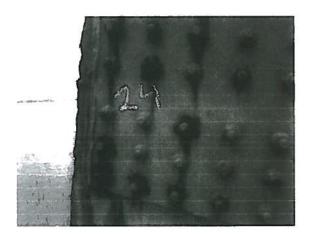

3. East waterside leg - 5 ft. above lower sill beam - 50 % loss

4. Portal beam to leg splice plate -- severe corrosion

5. East upper water side leg bolted connection – severe corrosion

P. LANDSIDE LEGS

EAST LEG

1. Extension of portal beam – severe corrosion > 50% loss.

WEST LEG

1. Severe corrosion up landside leg along doubler plates. Material loss >50%.

2. Pin to portal beam. Severe corrosion >50% loss.

Q. WATER SIDE SEAL BEAMS

1. Top flange – severe localized corrosion pockets – nominal 0.500" Measured 0.250"

R. WATERSIDE TRUCKS

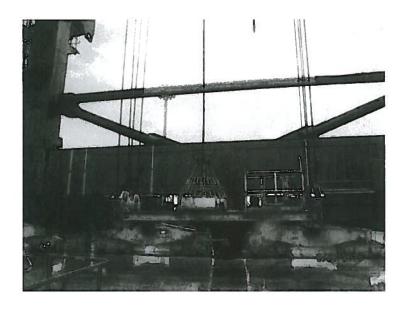

S. LANDSIDE TRUCKS

Page 18

T. LIFTING HEADER

1. Limited corrosion - fair condition

In addition, some photographs and video aerial inspection was recorded through the use of a DJI Phantom 4 drone using an onboard 4k camera. This video is provided on the attached flash drive.

Page 19

While at the port, we made a cursory look over the Hitachi cranes "G4, G5" & G6" in the event a request for proposal was made to perform a structural examination of the weldments in the future.

Videos were taken of these three in service cranes for baseline inspection purposes.

It was noted that the port cranes are directed exposed to the salt water elements from the sea and downwind from two (2) power generation plants.

Thank you once again for allowing Challenge Engineering & Testing, Inc. the opportunity to be of service on this important project at the Port of Guam. In the event any questions arise, please feel free to contact us.

Respectfully Submitted,

Sincerely, Challenge Engineering & Testing, Inc.

V. J. Thompson III, P.E President

David C. Wiggins, AWS/CWI NDT Level III

MEMORANDUM

TO:

Board of Directors

Website: www.portguam.com

FROM:

General Manager

SUBJECT:

Budget Request - Port Week 2016

Port Week is scheduled for October 17-21, 2016, celebrating the Port's 41 years of service. In support of the 2016 Port Week, there exist a variety of functions and activities which include the Opening Ceremony and Grand Finale that requires planning and preparation.

For the upcoming event, the amount of \$12,000.00 is being requested, and as practiced in prior years, PAGGMA Association will handle the disbursement of funds. A financial report accounting for such funds will be submitted to the Finance Division. The funding source for this purpose is through the Port Incentive Account.

I am available should you have any questions.
