1.	Heavy- Duty Mobile Filing System	1	LOT	\$ _____	\$ _____

BIDDING ON:

Manufacturer: _____

Model Number: _____

Year: _____

Specifications: _____

Date of Delivery: _____

GENERAL REQUIREMENTS:

The intent of this specification is to solicit bids for a high-capacity, heavy-duty mobile filing system designed to maximize storage efficiency while ensuring durability, ease of operation, and compliance with safety standards. The selected vendor shall be responsible for providing, delivering, and installing a complete mobile shelving system that meets or exceeds all applicable local safety and accessibility regulations, including ADA compliance. The system must include a minimum five-year warranty on all components, including shelving, tracks, and mechanical systems.

The specifications outlined below describe the minimum requirements for the Heavy-Duty Mobile Filing System. The bidder shall confirm compliance with each requirement in the Bidding On/Remarks section. The Port Authority of Guam (PAG) reserves the right to conduct reasonable tests upon delivery and prior to final acceptance.

The bidder shall provide comprehensive on-site training and instruction to PAG staff for the proper operation and maintenance of the system.

SPECIFICATIONS:

**BIDDING ON
OR REMARKS:**

Mobile File: (2 each)

10' x 9', Legal-size, end-tab filing, 7-tier shelving, including dividers and Locking system

Mobile File: (1 each)

10' x 4', Legal-size, end-tab filing, 7-tier shelving, including dividers and locking system

Shelving Construction

- Shelving units must be constructed of high-strength steel with a corrosion-resistant powder-coated finish.
- Each unit must support a minimum of **500 lbs.** per linear foot.
- The shelving system shall be fully adjustable for high-density filing applications.

System Design

- The system must operate on floor-mounted tracks with anti-tip mechanisms for stability.
- Tracks should be made of heavy-duty steel and designed to accommodate the specified load capacity.
- Shelving system must be available in manual, mechanical-assist, or powered operation.

Customization

- The shelving system must be customizable in terms of height, depth, and width to fit the available space at the installation site.
- The system must be designed for legal-size folders.

Safety and Security Features

- Safety brakes must be included to prevent unintended movement of shelves.
- Anti-tip devices must be installed for overall stability.
- The system must include locking mechanisms for security and controlled access.
- Aisle safety sensors must be available for motorized systems to prevent accidents.
