NEWS RELEASE

Two More Port Employees Test Positive for COVID-19

Piti, Guam, September 4, 2021: Port Authority of Guam General Manager Rory J. Respicio was notified that two more employees have tested positive for COVID-19.

These two vaccinated employees were exposed to the COVID-19 positive case reported September 1, 2021 and were identified through contact tracing.

The Port's Contact Tracing Team has identified twenty-three close contacts connected with these two positive cases.

"Despite our best efforts at the Port Authority to stop COVID-19's spread among our workforce, we are seeing a surge because of the Delta variant. These three latest positives are all connected and within the same division, so clearly this brings us to a whole new level of concern. Public Health Director Art San Agustin and his staff, continue to provide timely testing for those identified through contact tracing efforts and we will continue to follow all of the Governor's directives as well as the CDC guidelines for critical infrastructure worker," said Respicio.
